## Morningstar Investment Management LLC Analysis

We are removing AB High Income from fiduciary coverage. We had placed the fund on watch two years ago due to poor performance along with the impending retirement of AB's former CIO, Doug Peebles. Performance has remained muted since we placed the fund on watch and the fund's flexible, risk-seeking approach does not give us any comfort in this already-volatile corner of the bond market.

## Morningstar Investment Management LLC Analysis

We are placing Western Asset Core Plus on watch due to very poor recent performance. The fund places in the bottom percentile among category peers over the last year. In fact, although strong long-term returns remain intact, recent returns are so poor that the fund's trailing three- and five-year returns are now in the category's bottom quartile. The primary driver for the decline has been the team's decision to overweight duration. The fund's exposure to emerging-market debt has secondarily contributed to the poor recent returns. Given the fund's strong and deep team and its long-term history of strong returns, there is reason to expect the fund to rebound from this mishap. We will be watching it closely in the meantime.
