Morningstar Investment Management LLC Analysis

This fund currently fails the style screen as result of placing just into the small-blend square of the style box, but this is a function of the index that it tracks. It still supplies adequate mid-cap exposure. This fund also fails the manager tenure screen because of manager changes, but we are generally not concerned about manager changes for index funds.

Performance: The fund has finished in the Small Growth category's top three quartiles in 7 of the 10 years it's been in existence.

Management: The fund's management has been in place for 29.42 years.

Style: The fund has landed in its primary style box — Small Growth — 81.82 % of the time over the past three years.

Net Expense: The fund's expense ratio of 1.3 is 9.24% higher than the Small Growth category average.

Morningstar Investment Management LLC Analysis

Carillon Eagle Small Cap Growth is being removed from fiduciary coverage. The fund was placed on watch due to weakening performance rankings—its returns for the trailing three- and five-year periods through September 30, 2021, ranked in its category's bottom quartile, a result that was weak even relative to the fund's moderate level of risk. Modestly improved recent performance is consistent with the fund's milder risk characteristics but not strong enough to overcome its longer-term record, which is worse than expected even given the fund's risk attributes. The fund is being removed from coverage.
