Quantitative Screens

✓ Performance: The fund has finished in the Global Moderate Allocation category's top three quartiles in 8 of the 10 years it's been in existence.

✓ Management: The fund's management has been in place for 8.75 years.

✗ Style: The fund has landed in its primary style box — Large Blend — 65.38 % of the time over the past three years.

✓ Net Expense: The fund's expense ratio of 0.87 is 14.71% lower than the Global Moderate Allocation category average.

Morningstar Investment Management LLC Analysis

This allocation fund fails the style consistency screen because the equity portion of the fund can move within the Stylebox at times. This is not surprising, given that part of the equity bucket is dedicated to a thematic sleeve, that can lead to different parts of the stock market depending on which themes are in play. But, as a broad, global allocation fund, we are not concerned with this screen failure.

Russell Brownback since 09-2025

Quantitative Screens

Performance: The fund has finished in the Inflation-Protected Bond category's top three quartiles in 10 of the 10 years it's been in existence.

Management: The fund's management team has been in place for less than three years.

Style Consistency is not calculated for Fixed Income funds.

Net Expense: The fund's expense ratio of 1.09 is 60.29% higher than the Inflation-Protected Bond category average.

Morningstar Investment Management LLC Analysis

We are placing BlackRock Inflation Protected Bond on watch following the abrupt departure of its lead and longest-tenured manager, David Rogal. While the fund is on watch, we'll assess the ability of the current team--comanagers Harrison Segall, Johan Sjorgren, who joined the fund in February 2024, and newly appointed comanager Russell Brownback--to deliver competitive risk-adjusted results comparable to those the fund achieved during Rogal's tenure.

Morningstar Investment Management LLC Analysis

This fund fails our performance consistency screen. Its relative performance versus typical peers in the ultrashort bond category has struggled, partly due to its strict adherence to investing in government securities, which have lagged credit instruments. We believe those results are consistent with the strategy and do not merit putting the fund on watch at this time.
