Morningstar Investment Management LLC Analysis

This fund remains on watch. There was a manager departure in 2020, followed by weakening portfolio quality metrics, which has since improved. We are growing more comfortable with the portfolio managers, who have been running the fund together for almost three years. However, recent performance has been weighed by banks exposure.

Morningstar Investment Management LLC Analysis

We are placing Western Asset Core Plus on watch due to very poor recent performance. The fund places in the bottom percentile among category peers over the last year. In fact, although strong long-term returns remain intact, recent returns are so poor that the fund's trailing three- and five-year returns are now in the category's bottom quartile. The primary driver for the decline has been the team's decision to overweight duration. The fund's exposure to emerging-market debt has secondarily contributed to the poor recent returns. Given the fund's strong and deep team and its long-term history of strong returns, there is reason to expect the fund to rebound from this mishap. We will be watching it closely in the meantime.
