Morningstar Investment Management LLC Analysis

We are placing the DWS Enhanced Commodity Strategy on watch due to a weakening of the performance profile over recent years. This is a quant strategy with 5 alpha drivers, and 2 of those, momentum and tactical hedging have produced negative contributions in recent times and led the fund to bottom quartile returns over the trailing 3- and 5-years. Additionally, weakness in the fixed income alpha driver recently has led the team to reconsider their approach to this segment of the portfolio. As a result of the weak performance and upcoming change to the way the team approaches fixed income we are placing the strategy on watch whilst we monitor on both fronts.

Morningstar Investment Management LLC Analysis

We placed this fund on watch after the departure of longtime manager Michael Hong. We will keep the fund on watch while assessing its performance under the current team. This strategy's team underwent material changes, and its current members are still settling into place and we have not seen enough evidence that they can consistently execute.
