Quantitative Screens

✓ **Performance:** The fund has finished in the Global Allocation category's top three quartiles in 9 of the 10 years it's been in existence.

✓ **Management:** The fund's management has been in place for 8.25 years.

✗ **Style:** The fund has landed in its primary style box — Large Blend — 57.14 % of the time over the past three years.

✓ **Net Expense:** The fund's expense ratio of 0.85 is 24.11% lower than the Global Allocation category average.

Morningstar Investment Management LLC Analysis

This allocation fund fails the style consistency screen because the equity portion of the fund can move within the Stylebox at times. This is not surprising, given that part of the equity bucket is dedicated to a thematic sleeve, that can lead to different parts of the stock market depending on which themes are in play. But, as a broad, global allocation fund, we are not concerned with this screen failure.

Quantitative Screens

✓ **Performance:** The fund has finished in the Inflation-Protected Bond category's top three quartiles in 10 of the 10 years it's been in existence.

✓ **Management:** The fund's management has been in place for 7.05 years.

Style Consistency is not calculated for Fixed Income funds.

✗ **Net Expense:** The fund's expense ratio of 0.84 is 25.37% higher than the Inflation-Protected Bond category average.

Morningstar Investment Management LLC Analysis

This fund fails our expense screen with fees that are higher than the broad category average. Plan costs are sometimes wrapped into fund fees, but because costs are predictive of a fund's future relative performance, we would still like to see lower overall expenses here.

Morningstar Investment Management LLC Analysis

We are placing the Brandywine Global Opportunities Bond fund on watch due to the degree of underperformance in 2024 and the overall risk profile of the fund. This is a higher risk strategy, thanks to inclusion of EMD and EM currency, and in 2024 ranked in the bottom 5% of Global Bond fund peers. Risk is persistently higher than peers, in the form of standard deviation and drawdown, so, coupled with the weakness in 2024, we are placing the strategy on watch whilst we assess the overall risk/return profile.
