Morningstar Investment Management LLC Analysis

We are placing Invesco Global on watch due to concerns about the fund's deteriorating performance. After posting below-median results in 2020 and 2021, the fund posted a 2022 loss that was 400 basis points worse than the category average. That outside loss leads us to put the fund on watch while we monitor the manager's ability to get performance back on track.

Morningstar Investment Management LLC Analysis

We are placing Western Asset Core Plus on watch due to very poor recent performance. The fund places in the bottom percentile among category peers over the last year. In fact, although strong long-term returns remain intact, recent returns are so poor that the fund's trailing three- and five-year returns are now in the category's bottom quartile. The primary driver for the decline has been the team's decision to overweight duration. The fund's exposure to emerging-market debt has secondarily contributed to the poor recent returns. Given the fund's strong and deep team and its long-term history of strong returns, there is reason to expect the fund to rebound from this mishap. We will be watching it closely in the meantime.
